Wednesday, February 6, 2019

Using Data to Guide Instruction (morning session)

This session provides prekindergarten teachers with an understanding of the key components of direct instruction and how they can use the teaching and learning cycle to make instruction impactful. This hands-on, highly interactive session will help teachers understand how to evaluate and plan small group instruction using their CIRCLE Progress Monitoring data. Teachers will also be shown how to use the CIRCLE Activity collection as a planning tool. Teachers will have several opportunities to work with and learn from each other as they practice techniques presented during the training.

* Participants must use CIRCLE Progress Monitoring

Impacting Learning In Centers (afternoon session)

Center time provides critical learning opportunities in an early childhood classroom. This session provides teachers with multiple strategies to ensure this designated time of play is impactful on student learning and vocabulary development. Participants will learn how to structure and manage centers, how to engage students in meaningful conversations during center time, and will discover how to actively engage children in learning through themes and purposeful choices.

"Very informative review on how to follow the lesson cycle for maximum student impact. Excellent presentation of all the tools available for analyzing student data and using it to plan whole and small group instruction." - Teacher from Region X training

"I learned how to make my centers geared more to our theme and took away a lot of engaging center activity ideas. I wish we could do more of these in-services." - Andrews ISD Teacher

"Great presentation, very informative." - Galena Park ISD Teacher
